Memorial stones are read facing in a north-easterly direction.

Monuments & Markers General Guidelines

Memorial Tablets

All memorial tablets must conform to the following:

- Each memorial tablet shall be installed in a position as described on the previous page and shall have its top surface set level and flush with the surface of the surrounding ground.
- Each bronze or any other durable material memorial tablet shall be attached to a concrete base not less than four (4") inches thick with side surfaces true and perpendicular with the top surface of the attached tablet.
- Each stone memorial tablet shall be not less than four (4") inches thick and shall have its side surfaces true and perpendicular with its top surface.
- Except as permitted in subsection (e) of the Cemetery Bylaw, the top surface of memorial tablets and concrete bases on any sized grave may be installed to within six (6") inches of the boundary of each grave space.
- A memorial tablet smaller than its concrete base may be installed on a grave provided that the part of the concrete base exposed as a border surrounding the tablet is not wider than two (2") inches, is the same width on each side of the tablet, and has a smooth surface slightly bevelled to allow the water to run off from the outer edges.

Upright Memorials:

- An upright memorial must be fixed upon a four feet square concrete base and have a minimum clearance of ten (10") inches from the sides and a maximum thickness of six inches.
- An upright memorial must not exceed the maximum height of thirty-six (36") inches.

General Guidelines:

- No grave or grave space in the cemetery shall be defined by a fence, hedge or railing.
