

## Age-Friendly Accessibility and Inclusion Action Plan DOM-22-07

### **Q1 - Is there a little wiggle room for the Age-Friendly & Inclusion Plan project completion date?**

Yes. The project will need to be completed and invoiced by August 2023. Ideally, the project will be completed within 6-8 months of award.

### **Q2 - What are the engagement expectations for the projects?**

Community Engagement Activities will be conducted in person and online which will include the following:

- Produce community-wide survey
- Work with Mackenzie on survey deployment and distribution
- Meet with stakeholders for interviews and focused conversations

### **Q3 - In appendix B, one of the project deliverables is a demographics update? Can you please clarify/expand on what this will entail?**

Our intention is to identify the needs of the public for accessibility and inclusion. Census data will be the starting base for the project. We would like to expand on this data to include age and ability statistics through community engagement (public survey, interviews, and focused conversations).

### **Q4 - The deliverables include a presentation to Council on the final report/action plan. Is a virtual presentation to Council an option for this?**

A virtual presentation is acceptable.
